PROFESSIONAL SUMMARY

BI Analyst with a strong foundation in corporate finance and data architecture. Expert in translating complex financial datasets into automated solutions, ranging from DCF valuation models to live Python-driven macro trackers. Proven ability to architect end-to-end pipelines in SQL and Microsoft Fabric, utilizing DAX and Power BI to identify ₦100M+ growth opportunities and mitigate operational risks through data-driven executive reporting.

FEATURED PROJECTS

Nigeria Macro Economic Tracker | Automation & BI Project *Data Engineering · Power BI · Python ·*
Python · Power BI · Microsoft Fabric · CBN/NBS/World Bank APIs · GitHub Actions | link

- ***Engineered an end-to-end automated ETL pipeline*** using Python and GitHub Actions to fetch live API data from the CBN and World Bank, eliminating 100% of manual data entry for weekly updates.
- ***Developed a proprietary Economic Stress Index (0-100)*** by applying min-max normalization and weighted composite scoring across 7 indicators, providing a real-time "Amber" stress rating (51.73) as of March 2026.
- ***Architected a cloud-integrated Power BI dashboard on Microsoft Fabric,*** utilizing complex DAX measures to visualize NGN/USD volatility, inflation trends, and GDP growth for high-level fiscal monitoring.

NovaPay Financial Services | DCF Valuation & BI Project *Finance*
Excel (3-Statement Model · WACC · DCF · Sensitivity) · link

- ***Valued a fintech entity at ₦8.24B (Base Case)*** by building a fully integrated, IFRS 9-compliant 3-statement DCF model with Gordon Growth and sensitivity analysis.
- ***Quantified investment risk across Bull, Base, and Bear scenarios*** by performing 2-variable sensitivity mapping (WACC vs. TGR), identifying a critical 7.5% NPL threshold for equity value viability.
- ***Synthesized complex valuation outputs into an 7-slide investment memo***, communicating a 26.4% WACC build-up and equity bridge to simulate a professional M&A or Transaction Advisory mandate.
- ***Automated the financial reporting lifecycle*** by engineering SQL views that transformed raw 3-statement data into clean, report-ready dimensions, reducing manual dashboard update time by 100%.

Amazing Grace Thrift Store | BI Analytics Project *Data Analytics · Power BI · SQL Server · Microsoft Fabric*
SQL Server · Power BI Desktop · DAX · Microsoft Fabric · link

- ***Identified a ₦171.8M (41%) revenue growth opportunity*** from anonymous walk-in customers by developing a multi-page Power BI suite and 30+ custom DAX measures to segment retail traffic.
- ***Mitigated procurement risk by identifying 2 suppliers below acceptable reliability thresholds***, achieved by engineering a Supply Chain dashboard in SQL and Power BI to track vendor fulfillment and sell-through rates..
- ***Influenced a strategic overhaul of promotional planning*** by visualizing a -34% sales period lift and a 32% revenue concentration in November, providing stakeholders with data-driven seasonal insights.

EXPERIENCE

PwC Nigeria Lagos, Lagos State
Information Technology Intern Nov 2024 – Feb 2025

- ***Automated cloud system migration and data reconciliation*** by developing Python scripts, eliminating manual transfer risks and ensuring 100% data integrity for firm-wide historical engagement records.
- ***Optimized operational efficiency*** by analyzing system and network performance data, identifying key bottlenecks that led to targeted infrastructure improvements and reduced system latency.
- ***Enhanced firm-wide productivity*** by facilitating cross-functional workflows to streamline IT support, successfully reducing staff downtime and accelerating technical resolution times.

Surulere Local Government Office Lagos, Lagos State
Data & IT Intern Jul 2025 – Present

- ***Enforced end-to-end data governance and validation protocols*** by serving as the primary data support resource across 5+ departments, ensuring 100% accuracy in municipal records maintenance.
- ***Strengthened organizational data security*** by migrating critical legacy datasets to digital and trackable form and implementing granular access controls to align with internal data protection policy standards.

EDUCATION

Covenant University Oct 2024
BSc., Computer Science Ota, Ogun State

- GPA: 4.12 / 5.0 — Second Class Upper
- Relevant Coursework: Data Management, SQL Fundamentals, Algorithm Design, Modelling & Simulation, Structured Programming

TECHNICAL PROFICIENCIES

Data & Cloud: Microsoft Fabric, SQL Server, Python (ETL), Snowflake, Power Query.
Analytics & BI: Power BI, DAX, Tableau, Power Platform, Composite Index Design.
Finance: 3-Statement Modelling, DCF Valuation, WACC, Sensitivity & Scenario Modelling.

CORE COMPETENCIES

Strategy: Business Process Analysis, Requirements Gathering
Execution: Data Governance, Stakeholder Reporting, Cross-Functional Collaboration.

CERTIFICATIONS

- IBM Business Intelligence (BI) Analyst — 2026
- Microsoft Certified: Power BI Data Analyst Associate (PL-300) — 2026
- KPMG U.S. Advisory Job Simulation — 2025
- DataCamp Data Analysis Associate — 2026
- Excel for Analytics — Udemy, 2025
